## **Question #1 for Ron:**

“I’ve been hearing that a music retailer can get into some serious legal trouble by stocking “house brand” products that violate I.P. laws...can you explain?”

## **Question #2 for Jim:**

“With so many music retailers hopping on the lucrative rental program bandwagon, what legal pitfalls do they need to be aware of to not get sued or fined?”

## **Question #3 for Ron:**

“Have you been finding (like us) music dealers who have been poorly organized or are ignoring vital business governance, both from a legal & tax standpoint?”

## **Question #4 for Jim:**

“With the noticeable increase in labor audits and horrid outcomes, what advice do you have for retailers who treat their music teachers & repair techs as independent contractors?”
