

EFNOTE Next Generation Drum Series

EFNOTE 3 Drum Kit

We believe EFNOTE is producing the next generation in electronic drums and here is why...

Every instrument sampled on the new EFNOTE Series has been meticulously recorded and layered to achieve full realism. We've hand selected and perfected what we feel are the most record-ready and performable kits available today.

REALISM

Just clean, beautiful sounding drums in the raw, not weighed down by processing. Tru-Aco™ sound technology provides a super-dynamic, uncompressed acoustic sound. The difference is felt through an immediate, impactful connection

PLAYABILITY

The new EFNOTE 3 provides ultra-sensitive triggering zones and an undetectable amount of latency, letting you engage immediately, giving drummers exactly the experience they've been waiting for. Cymbals, Toms, Snare and Kick all spring to life, with an acoustic feel that hasn't been available until now!

AESTHETICS

In order to create a bond between player and instrument, we had to get the aesthetic just right. Our ultimate goal is to know that you love what you're playing on

STYLE TO SPARE

Attention to detail is on display with clean white glitter shells, mounted powder grey hardware and chromed precision components.

3-Zone, Multisensor Snare with **SIDE-STICK**

There's no more need to push a button to change your "RIM" to a "SIDE-STICK". Just play!

360° playing AND CHOKE zones

NO DEAD ZONES!

Hi-Hat Pedal with Tru-Motion™ Technology, Optical Sensing & Inertia Weight Simulation

This weighted Hi Hat pedal has a stellar, smooth action, which allows you to use heel/toe, open/close foot-only playing VERY accurately.

STANDS

Our “λ”(Lambda) Tripods are Lightweight and Sturdy. Their Future/Classic design makes them capable of overlapping super tight or spreading out for an angular, more open setup.

Just plug in USB to your computer, open your favorite DAW and/or drum software and you can record 8 channels of Audio and USB triggered MIDI simultaneously. THIS SOUNDS HUGE

You can also go
Stereo Analog Out
4-CH Analog out
MIDI DIN Out
Bluetooth MIDI In/Out

Send the raw signal to any DAW or Soundboard and leave the processing stage for when it was intended.

SPECS / FEATURES

Main Features

- Tru-Aco™ Stereo Sampled Sounds
- Tuning/Muffling/EQ and Sensitivity/Threshold/Curve for Each Pad
- “Virtual Pad” Function for Sound Layering
- Quick Pad Level Adjustment in Mixing Window
- Multi-Track USB Audio Recording for Mac/PC (ASIO)
- Low Profile Touchscreen Module
- 8 Channel USB audio output
- Multi-Track MIDI and USB-MIDI IN/OUT
- Flexible I/O Routing with GUI
- Individual Click Output
- Set List Function for Live Performance
- Various Training & Analyzing Functions
- Internal Record/Playback Function
- Metronome with On-Board Speaker

Drum Interface

- 3 Zone Snare, Ride, Crash
- 2 Zone Tom 1/2/3/4, Hi-Hat, Crashes
- 1 Zone Kick

Audio / MIDI

Line (1/2) Output (2x TS)

Phones (3/4) Output (Stereo Mini) Audio Input (Stereo Mini)

USB 8-ch Audio Output

USB 2-ch Audio Input

USB MIDI In/Out

Bluetooth Audio Input

Bluetooth MIDI In/Out

MIDI Output (5-pin)
